

Národná pozícia UCM v Trnave podľa databázy najšpičkovejších vedeckých časopisov v oblasti prírodných vied

University of Ss. Cyril and Methodius in Trnava (UCM)

Rok	Pozícia na Slovensku	Share	Count
2017	2	2.31	5
2018	3	1.61	3
2019 - Október	4	1.99	5

The Nature Index is a database of author affiliation information collated from research articles published in an independently selected group of **82 high-quality science journals**. The database is compiled by [Nature Research](#). The Nature Index provides a close to real-time proxy of high-quality research output and collaboration at the institutional, national and regional level.

The Nature Index is updated monthly, and a 12-month rolling window (1 September 2018 - 31 August 2019) of data is openly available at www.natureindex.com under a Creative Commons non-commercial license. The Nature Index also releases annual tables of country- and institution-level calendar-year output back to 2015, as well as an archive of the annual tables released in previous years.

Count or Fractional count (FC)

A Count of one is assigned to an institution or country/region if one or more authors of the research article are from that institution or country/region, regardless of how many co-authors there are from outside that institution or country/region.

Share or Article count (AC)

A fractional count allocated to an institution or country/region for an article that takes into account the percentage of authors from that institution or country/region and the number of affiliated institutions that contributed to the article. For calculation of Share, all authors are considered to have contributed equally to the article. The maximum combined Share for any article is 1.0.
